

OSCAR VERBEEK

I aim to uncover which principles should underly future products, so they become means for people to make the most of their life. I combine human centered methods with a holistic view and a keen eye for technology. I photograph seagulls because of a joke that ran out of hand, which is weird because usually I take things quite seriously. I am an avid boulderer. Also, I'm learning how to make my own clothes.

Education

- '11 - '13 **International Baccalaureate English A**
- '13 - '18 **Bachelor Industrial Design Engineering @TU Delft**
[Honors programme modules in Personal Leadership and Design Thinking.](#)
[My bachelor thesis in which I used Vision in Product Design was awarded a 10.](#)
- '15 - '16 **Minor Automotive Design @TU Delft**
- '18 - now **Master Design for Interaction @TU Delft**
[Pursuing my growing interest in design for human flourishing.](#)

Experiences

- '13 - '16 **Various Committees @Study Association I.D**
[As chairman of the Freshman Weekend I was responsible for a 3-day event in which over 200 new students get acquainted with the faculty of IDE and each other.](#)
- '13 - now **Various Freelance activities**
- '15 - '16 **Exterior Designer @Forze Hydrogen Racing** part-time
[Design and sculpture of the car, later also graphics and headlight modules. Worked in the production team through preparation of molds, carbon layups and final assembly.](#)
- '16 - '17 **Technical Manager @Forze Hydrogen Racing** full-time
[Team planning, well-being, and priority management. Gained a lot of perspective on my own skills and what leadership means.](#)
- '17 - now **Workshop Assistant @TU Delft**
[Helping students build their prototypes. Instructor for lathe and mill.](#)
- '18 - now **Cases @Uber, City of Amsterdam and Rotterdam, Rabobank, Zalando, Kone, GovJam**
[Developing \(UX\) strategies and concepts in a one day format.](#)
- '19 - '20 **Reframing Budgeting Passion Project** with Frans Dijkmeester
[How can one be wise and happy with the expenses they make? We envisioned new ways of interacting with money.](#)
- '19 - '20 **Intern Future Monitoring Sysem @Leiden University Medical Center**
[I analyzed the current practices and implementation of patient monitoring, and made recommendations on moving towards possible future monitoring systems.](#)

Skills

- Hardware **Lathe, Mill, Lasercutting, 3D Printing, Design sketching, Prototyping**
- Software **Adobe PS/AI/ID/PR/AE/XD, Rhinoceros, Arduino, Figma, HTML/CSS**
- Methods **Vision in Product Design, Design for Emotion, Contextmapping**
- Language **Dutch, English (near native), German (ein paar Wörter und Sätze...)**
